

# Do you use VIEW?

# DOUBLE VIEW

**D**oubleView is a highly sophisticated extension ROM for the 'VIEW 3.0' wordprocessor. DoubleView's 32k of code provides previously undreamed of wordprocessing facilities on the BBC Micro. With the DoubleView system installed, your BBC micro will have the power of a 48k Wordprocessor, creating the most enhanced environment for VIEW.

Here's a summary of just a few of DoubleView's exciting new features:

- Professional style split screen operation
- Enables two documents to be worked on simultaneously
- Both documents visible on screen
- Variable height windows
- Constantly updated status information
- Display of
  - free memory
  - position in the document
  - current file and printer driver names
  - which (if any) markers are set for the two current documents
- Easy transfer of text from one document to the other
  - Move or Copy pieces of text between documents
- Clipboard
- Jot down notes in the clipboard whilst composing letters
- 'Cut and Paste' clipboard notes into main document(s)
- 'Multi-File' system
  - Links many short documents together into one long document
  - Far simpler, and more flexible than 'continuous processing'
  - No more limits on document size due to memory restrictions
- Full on screen help system
  - Help on VIEW and DoubleView commands
  - Driven by easy to use pop-up windows.

**TubeLink**

*continued overleaf...*

- Much improved text saving facilities
  - Fast, flexible block saves
  - Save from the start of the document to any marker
  - Save from any marker to the end of the document
  - Save from any marker to any other one
  - All as fast as saving a whole document with VIEW's SAVE command
  - No more tedious WRITES to save blocks
- Enhances ViewSheet use
  - Read/merge part of a ViewSheet spreadsheet into a document
  - Facilitates creation of financial reports, invoices, costings
- Options/Configuration files
  - Save common set up sequences and preserve them for next session
  - Full details of the screen layout and colours
  - Details of window sizes and the files being edited
- Automatic backup of documents
  - Protect valuable text against power failure or machine hang-ups
  - Both current documents may be set at chosen intervals
- Many other extra functions
  - Up to 35% faster at screen updating than VIEW.
  - Editing in 80 or 106 column modes
  - Multiple copies of documents may be printed automatically.
  - Integrates with Computer Concepts' SpellMaster if fitted
- Fully compatible with DFS, ADFS, and ECONET
- Thoroughly comprehensive 32pp user guide supplied
