## NEW RELEASES

March sees the release of many very good games. Superior's *Play It Again Sam 2* represents excellent value for money — 4 great games for the price of one. *Quest* (also from Superior) is, in my opinion, even better than *Citadel*. Try it, you won't be disappointed. And there's *Skirmish*, *Tetris*, *Pro Golf*, *Plan B2* and *Tutankhamun's Revenge*. I'm afraid I can't choose a Game of the Month. I'm too busy playing them all! This is a game player's paradise.

## FUTURE RELEASES

Lots of companies have many new games planned for later in the year. Last year's releases will pale in comparison.

Superior intend releasing 2 more games next month. One is *Guildmaster* — *Revenant 2*; it features many new ideas and also includes a superb editor. Their other game is top secret — honest.

Superior also plan to release (by popular demand) a further 40 screens for *Repton 3* fans. I will be designing all 40 of these screens and intend to make them the best yet. I'll tell you more about this release and other new releases next month.

## IMPACT NEWS (Part 4)

My name is Mark Botterill. I initially became interested in computer games 2 years ago. This was when Superior's boss, Richard Hanson asked me to work for him. Since then I have tested many games for him — most notably the enhanced version of *Elite*.

In a freelance capacity I also designed most of the screens for *Repton Around The World* and *The Life of Repton*.

I set up Impact Posters 6 months ago, initially producing 6 posters; I then obtained the rights to produce the *Elite* poster.

I hope to produce more posters in the near future and to start publishing games myself especially for The Impact Games Club.

So please send me any games you think are good enough to publish; I will pay large royalties for any games which I release.

## REPTON FANS

Having designed most of the screens for *Repton The World and The Life of Repton* I feel largely responsible for them.

Next month I will give you information on how I intend to help you complete even the trickiest of the screens.

Bye for now
