

INDOOR SOCCER

(Alternative Software Limited)

LOADING INSTRUCTIONS

Type Chain " " then Return.

Indoor Soccer is a two player indoor football simulation.

The names of the teams may be altered, as may the controls and the duration of a game.

You control the black or white player who is filled in yellow.

This player is automatically chosen for you by the computer.

Control of the goalkeeper is acquired by pressing the 'Kick' Key whilst the ball is in goal mouth.

The ball will also rebound off the edges of the pitch.

The default keys are:

Player 1		Player 2
Q	— Up —	:
A	— Down —	/
Z	— Left —	,
X	— Right —	.
Caps Lock	— Kick —	Return

Copy —Pause

Esc — Abort

INDOOR SOCCER

OPTIONS

- 1 One player game
- 2 Two player game

Select option using keyboard or joystick in port 2. In one player game you play against the computer. There are three skill levels available:

- 1 Hard (expert)
- 2 Medium (played it before)
- 3 Easy (beginner)

The play time is 10 minutes. At half time the teams change ends. To kick the ball press the fire button: the longer you keep the fire button depressed before releasing it — the harder the kick. Persistent fouling of a player will result in the penalty kick off i.e. the centre kick off by the offended team. Sometimes, heavy fouling will result in fighting between players and a penalty is awarded. The goal keeper can only save the goal by punching it out. To punch the ball out, press the fire button.

PENALTIES

A penalty may be awarded if fighting breaks out. The defender signals his readiness by pressing the fire button. The penalty taker then has 10 seconds to take the penalty. Move the joystick in the direction you wish to travel and press the fire button, or use keyboard controls.

Skilful manoeuvres are possible with either keyboard control or joystick. Sidewall rebounds may be used to dodge opponents.

PROGRAMMERS

*If you have written a good programme.
ANY home computer, send it to us now for evaluation. We pay EXCELLENT royalties!! Your programme could be in the shops within weeks!! SEND TO: ALTERNATIVE SOFTWARE Units 3-6 Bailygate Industrial Estate, Pontefract, West Yorkshire. We will acknowledge receipt of your programme same day.*
