

# Mushroom Invasion (Model A)

All right. So you've dealt with the worst that the galaxies can throw up. The Space Invaders, the asteroid belts, the nightmare timewarp tunnels, the vampire cats - you've seen it all haven't you? Don't you believe it! Things can only ever get worse. This time around you are faced with a mindless, soulless, heartless fungus . . . the invasion of the mushrooms. It's all over for Earth. The mushrooms already cover half the globe and they're moving in for the final kill. You are the commander of the only surviving security cruiser, and your laser cannons are running low. Wait until you see the whites of their undersides and make every shot count. If they hit your ship you're finished.

```
